BANTLEON SELECT INFRASTRUCTURE, a sub-fund of BANTLEON SELECT SICAV, class PA, EUR

WKN / ISIN: A2PH94 / LU1989515793

This sub-fund is managed by the BANTLEON AG (the »Management Company«), which belongs to the BANTLEON BANK Gruppe.

Objectives and investment policy

The objective of the sub-fund is to achieve a positive investment result and an above-average return over the long term, taking into account the opportunities and risks of the international capital markets, while at the same time taking into account the principle of risk diversification, the security of the investment capital and the liquidity of the assets.

The sub-fund is an equity fund that invests primarily in equities of companies that offer solutions to the challenges of a changing world and thus serve the structural trends of demographic change, urbanisation, scarcity of resources and digitalisation. The stocks selected are primarily those of companies domiciled or operating in Europe.

The investment management invests at least 75% of the sub-fund's assets in equities of listed companies worldwide, in particular those that generate their revenues primarily from activities in the infrastructure sector.

The sub-fund may hold assets in all currencies of states that feature in the MSCI All Country World Index (ACWI).

Derivatives transactions may be entered into for the purpose of hedging or efficient portfolio management or to generate additional returns.

The sub-fund is actively managed. It is not managed in reference to a benchmark.

Income of the sub-fund (or: in this unit class) can be distributed entirely or partially.

Investors can in principle request that the Management Company redeems their shares on every exchange trading day.

Risk and reward profile

This indicator relies on historic data and cannot be used for a prediction of future developments. The categorisation of the sub-fund may change in the future and is not a guarantee. Even a fund in category 1 is not an entirely risk-free investment.

The sub-fund has been placed in category 6 because its share value fluctuates strongly and therefore the chance of profit but also the risk of loss can be high.

It may be that due to the calculation model not all risks are accounted for when placing the sub-fund in a risk category. An extensive description of the risks is included in the section »Information on risks« in the prospectus. The following risks have no direct bearing on the categorisation but may nevertheless be of relevance to the sub-fund:

- Currency risks: If the sub-fund holds assets in a currency other than its reference currency, investors are exposed to a currency risk. This can be reduced by means of hedging transactions.
- Risks from the use of derivatives: The sub-fund may use derivatives. This does result in both increased opportunities and increased risk of loss. The use of derivatives to hedge against losses may also reduce the profit opportunities of the sub-fund.
- Custody risks: The custody of assets, particularly abroad, may involve a risk of loss arising from the possibility that the custodian or sub-custodian becomes insolvent, breach duties of due care or engages in abusive conduct.
- Operational risks: The sub-fund may become a victim of fraud or other criminal actions. It may also suffer losses caused by misunderstandings or mistakes of employees of the management company or third parties or it may suffer damages caused by external occurrences such as natural disasters.
