Bantleon Yield, a sub-fund of BANTLEON SELECT SICAV, class PT, EUR

WKN / ISIN: A1C2HH / LU0524467916

This sub-fund is managed by the BANTLEON AG (the »Management Company«), which belongs to the BANTLEON BANK Gruppe.

Objectives and investment policy

Bantleon Yield is a balanced bond fund that seeks to achieve high interest income and additional returns without incurring excessive debtor risk. Management of the fund is based on Bantleon's immunisation strategy, which combines a variety of return components. The fund's total return is comprised of the following components:

- Management of average bond maturities ranging from approx. 0 to 6 years
- Management of the yield curve
- Management of sector, industry and bond allocation based on a medium to good credit rating (investment grade rating)
- Inclusion of inflation-indexed bonds on an intermittent basis

The investment manager invests solely in investment grade bonds, especially in government bonds (global), in regional or local government bonds, government-guaranteed bonds and covered bonds (OECD countries) as well as in corporate bonds and bonds issued by credit institutions (global). Up to 50% of the fund assets may be invested in government bonds from the United States, the United Kingdom, Canada or Australia.

These investments may entail currency risks in USD, GBP, CAD and AUD, which are largely hedged. Unhedged foreign currency positions may make up no more than 10% of the fund assets.

Derivatives transactions may be made to hedge investments, to manage portfolio maturities and to hedge against currency risks.

The sub-fund is actively managed. It is not managed in reference to a benchmark.

Income shall remain in the sub-fund (or: in this unit class) and shall increase the value of the shares.

Investors may demand to redeem their units every normal bank business day in Luxembourg.

Risk and reward profile

This indicator relies on historic data and cannot be used for a prediction of future developments. The categorisation of the sub-fund may change in the future and is not a guarantee. Even a fund in category 1 is not an entirely risk-free investment.

The sub-fund has been placed in category 3 because its share value fluctuates relatively little and therefore the chance of profit but also the risk of loss can be relatively low.

It may be that due to the calculation model not all risks are accounted for when placing the sub-fund in a risk category. An extensive description of the risks is included in the section »Information on risks« in the prospectus. The following risks have no direct bearing on the categorisation but may nevertheless be of relevance to the sub-fund:

- Credit risks: The sub-fund may invest a part of its assets in debt securities issued by governments and/or companies. The issuers of these debt securities may become insolvent which may result in the partial or full loss of the value of their debt securities.
- Currency risks: If the sub-fund holds assets in a currency other than its reference currency, investors are exposed to a currency risk. This can be reduced by means of hedging transactions.
- Risks from the use of derivatives: The sub-fund may use derivatives. This does result in both increased opportunities and increased risk of loss. The use of derivatives to hedge against losses may also reduce the profit opportunities of the sub-fund.
- Custody risks: Assets held in custody for safekeeping – particularly in other countries – may be subject to a risk of loss in connection with insolvency, violations of due diligence requirements or market abuse on the part of the custodian or a sub-custodian.
- Operational risks: The sub-fund may become a victim of fraud or other criminal actions. It may also suffer losses caused by misunderstandings or mistakes of employees of the management company or third parties or it may suffer damages caused by external occurrences such as natural disasters.
